Authorize

The Catalog V2 API allows you to access Kroger's catalog data. The catalog can be customized for clients based on their needs and requirements.

Pagination

Product search supports `pagination` with a default value of `20` results per page. Using the following parameters in the request, you can configure the `size` and `offset` of the response:

- `page.size` - Sets a number of products to be listed in the response.

- `page.offset` - Sets a number of products to skip in the response.

Catalog V2

API Operations

Name	Method	Description
Catalog Search	GET	Returns a list of products and their core information.
Catalog Inventory	GET	Returns inventory details for one or more products.
Deleted Items	GET	Returns a list of disabled products within a specified time range.

GET `/catalog/v2/products` Catalog Search

GET `/catalog/v2/products-inventory` Catalog Inventory

GET `/catalog/v2/deleted-items` Disabled Items
